and Bioengineering

*“We are not students of
some subject matter, but
students of problems.
And the problems may
cut right across the
borders of any subject
matter or discipline.”
– Karl Popper*

The Institute of Biosciences and Bioengineering at Rice University hosts the NIH Biotechnology Research Training Program.

This pre-doctoral program features:

- **Specialized coursework in biotechnology**
- **Career boosting leadership, mentorship and social events**
- **Industrial internships and fieldtrips**
- **Seminars from high profile biotech industrial and academic leaders**
- **Outreach activities during the summer**
- **Annual research retreat**

We hope that you will join us in the discovery of Biotechnology!
